Summary

- Full Stack Developer with hands-on experience building scalable web applications using Java, Node.js, Express.js, React.js, MongoDB, and MySQL. Strong foundation in DSA, OOP, and DBMS, with a track record of shipping production-ready modules, optimizing database performance, and integrating AI APIs into real-world tools.

Education

BE - Computer Science and Engineering (Cyber Security) — CGPA: 7.8/10

Bengaluru, Karnataka

Experience

Intern at iGeeks Bridging Technology

Feb 2026 - May 2026

Role - Full Stack Developer

Bengaluru, Karnataka

- Developed 3 production-ready full-stack web modules using Java, HTML, CSS, and JavaScript, reducing manual workflow steps by approx. 40 percent and improving overall application reliability.
- Designed and executed CRUD operations across MySQL and MongoDB, managing data for 2 database schemas and cutting average query response time by approx. 25 percent through optimized indexing.
- Maintained clean, modular codebase with Git/GitHub across a team of 4, enforcing consistent branching strategy that reduced merge conflicts by approx. 30 percent.
- Identified and resolved 15+ backend bugs in Java across 3 modules, improving system stability and achieving zero critical issues in the final 4 weeks of the internship.

Projects

AI-Powered Code Reviewer | [React.js, Node.js, Express.js, MongoDB, AI API, Git](#) **May 2026–July 2026**

- Built a full-stack code review tool that automatically flags issues and suggests fixes, cutting manual review time for small code changes.
- Designed RESTful APIs in Node.js/Express.js to handle code submission, analysis requests, and result delivery.
- Integrated an AI API to generate contextual code feedback, reducing the need for a second human reviewer on routine PRs.

AI Resume + Job Matcher | [React.js, Node.js, Express.js, MongoDB, Gemini API, JWT](#) **July 2026 – Aug 2026**

- Built an AI-powered platform that parses resumes, extracts skills, and matches candidates against job descriptions — helping users identify skill gaps before applying.
- Integrated Gemini API to generate personalized, actionable resume feedback instead of generic suggestions.
- Implemented secure authentication and data storage with JWT, Express.js, and MongoDB, protecting user resume data end-to-end.

Technical Skills

Programming Languages: Java, JavaScript

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Concepts: OOP, DSA, REST APIs

Tools: Git, GitHub, VS Code, Postman

Certifications

- Java with Data Structures and Algorithms – Physics Wallah (2025)
 - Software Engineering Job Simulation – JPMorgan Chase (2025)
 - Certified in Ethical Hacking and Cyber Security - Supraja Technologies (2025)
-
